SECRETARIAT GENERAL: 13, Place Albert 1<sup>er</sup> B – 6530 Thuin (Belgique)

---

**25.09.1998/EN**

**FCI-Standard N° 108**

**PICARDY SPANIEL**

(Epagneul picard)

**TRANSLATION** : Mrs Kincaid.

**ORIGIN** : France.

**DATE OF PUBLICATION OF THE OFFICIAL VALID STANDARD** : 30.10.1964.

**UTILIZATION** : Pointing dog.

**FCI-CLASSIFICATION** : Group 7 Pointing Dogs.  
Section 1.2 Continental Pointing  
Dogs, Spaniel type.  
With working trial.

**GENERAL APPEARANCE** : A strong, broadbacked dog, well boned with strong limbs; gentle expression; head carriage gay and striking. Very well constructed forequarters.

## **HEAD**

**CRANIAL REGION** :

**Skull** : Wide and rounded, prominent occiput; parietals flat.

**Stop** : Sloping to the muzzle, not at right angle.

**FACIAL REGION** :

**Nose** : Brown, medium sized, nicely rounded.

**Muzzle** : Long, sufficiently wide, tapering from the set on at the skull to the nose; very slightly arched in the middle part.

**Lips** : Of medium thickness, slightly let down, not hanging.

**Eyes** : Dark amber in colour, well opened; expression frank and friendly.

**Ears** : Set on rather low, framing the skull with beautiful wavy, silky hair.

**NECK** : Well let into the shoulders, muscular.

**BODY** : Haunch bones slightly lower than the withers.

Loin : Straight, not too long, wide and full.

Croup : Very slightly sloping, rounded.

Chest : Deep, sufficiently wide, reaching well down to elbow level.

Flanks : Flat, yet deep, though with a slight tuck-up.

**TAIL** : Set-on not too high. Hanging down in two slight curves, convex and concave. Not too long, furnished with lovely silky feathering.

## **LIMBS**

### **FOREQUARTERS** :

General appearance : Forelegs straight, well muscled, feathered.

Shoulders : Shoulder-blade rather long, somewhat upright, sufficiently muscled.

Upper arm : Well muscled.

Elbow : Well set.

### **HINDQUARTERS** :

General appearance : Hindlegs well feathered down to the hock.

Haunches : Prominent, reaching to the level of the back and loins.

Upper thighs : Straight, long, broad, well muscled.

Hocks : Slightly bent.

Rear pastern : Straight.

**FEET** : Round, large, tight, with a little feathering between the toes.

**SKIN** : Rather fine and supple.

## **COAT**

**HAIR** : Dense and not too silky; fine on head, slightly wavy on the body.

**COLOUR** : Grey mottling with brown patches on different pads of the body and root of tail. Most often marked with tan on head and limbs.

**SIZE** :

**Height at the withers** : 55 to 60 cm.

A tolerance up to 62 cm is accepted for males.

**FAULTS** : Any departure from the foregoing points should be considered a fault and the seriousness with which the fault should be regarded should be in exact proportion to its degree and its effect upon the health and welfare of the dog.

- Head pear-shaped, too narrow.
- Skull too square, too narrow, too short.
- Stop at right angle.
- Nose black, pointed, pinched; split nose.
- Muzzle too short, too curved.
- Lips too thick, too short.
- Eyes too light, too deep set, level with the skull; slit eyes; vicious look.
- Ears narrow, short, set on too high, too curly or lack of silky hair.
- Neck too long, too thin, too short.
- Back too long, sunken.
- Loin too long, too narrow, too weak.
- Croup too sloping.
- Chest too narrow, not deep enough.
- Flanks too full, too deep, with excessive tuck-up.
- Tail carried in sabre-fashion, too long, too curled, set-on too high or too low.
- Forelegs without feathering, fine, tied at elbows or out at elbows.
- Shoulder blade short, too upright or too oblique, sloping too much backwards.
- Upper arm with weak bone.
- Pastern joint knuckling over.
- Haunches too low, too high, too close together.

- Upper thighs narrow, lack of feathering.
- Hocks too bent or cow-hocked.
- Feet narrow, flat or splayed.
- Skin too thick.
- Hair fine, silky, curly, or too short.
- Too much brown colour, patched with white or black.

**DISQUALIFYING FAULTS:**

- Aggressive or overly shy dogs.
- Any dog clearly showing physical or behavioural abnormalities shall be disqualified.

**N.B.:**

- Male animals should have two apparently normal testicles fully descended into the scrotum.
- Only functionally and clinically healthy dogs, with breed typical conformation should be used for breeding.

# ANATOMICAL FEATURES
